Message from the Minister

Whether harvested from the sea or produced through aquaculture, Prince Edward Island seafood products are renowned for their distinctive flavour and high quality. The export of fish products accounts for more than 35 percent of the province's shipments to international markets, so I can confidently say that Prince Edward Island seafood products are enjoyed around the world.

The seafood processing industry has long been an important component of the economy of Prince Edward Island. In 2001, more than 150 million pounds of marine resources were harvested with the landed value in excess of $164 million. The industry has expanded in recent years. Seafood products are processed in the most modern processing facilities and the value of fish product shipments has increased significantly. However, one thing has remained the same. That is the proud Island tradition of offering only the best in quality seafood products - produced in a quality environment and harvested and processed with care.

I am pleased to present this Seafood Products Directory. With alphabetic listings of seafood plants, information on the wide array of products processed, and detailed contact information, I am sure you will find the directory to be a valuable reference guide. If you require further information on Prince Edward Island seafood products, please not hesitate to contact the Department of Fisheries Aquaculture and Environment or PEI Business Development Inc.

Sincerely,

Greg Deighan

Honourable Greg Deighan
Minister

Seafood Products Directory

This Seafood Products Directory is published by the Fisheries and Aquaculture Division of the Prince Edward Island Department of Fisheries, Aquaculture and Environment.

The directory is an alphabetical listing company names, as well as contact person and products processed by species. *(The information has been supplied by participating companies.)* Further information may be obtained by contacting the following:
